BEFORE

AFTER

The house was raised 16" to accommodate more head room for the finished basement.

Before

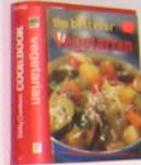

The existing cabinets were saved and reused with new granite countertops.

Additional counter space was created to provide more cooking area.

Pendant and can lights were used to improve lighting in the kitchen and seating area.

After

Finished Photos
of the Living
Room

The original dining area was relocated to make room for a breakfast bar that sits between the kitchen and the family room. The before pictures show the original dining room which is now converted to additional kitchen space and breakfast bar. The new dining area is now located on the opposite side of the kitchen and is easily accessible to the cooking area.

Master Bathroom

- The entire house was raised to increase the basement ceiling height. Prior to construction the headroom under the ductwork was less than 6 feet.

The Theater room was wired for the homeowners existing plasma television and surround sound system. An in wall book shelf was installed for storage of the homeowners video collection.
